

2020 California Almond Acreage Report

Pacific Region · P.O. Box 1258 · Sacramento, CA 95812 · (916) 738-6600 · (855) 270-2722 Fax · www.nass.usda.gov/ca

Released: April 22, 2021

RESULTS

California's 2020 almond acreage is estimated at 1,600,000 acres, 5.3% higher than the 2019 acreage of 1,520,000. Of the total acreage for 2020, 1,250,000 acres were bearing, 5.9% above 2019, and 350,000 acres were non-bearing, up 2.9% from 2019. Preliminary bearing acreage for 2021 is estimated at 1,330,000 acres.

Nonpareil continued to be the leading variety based on bearing acreage, followed by Monterey, Butte, Carmel, and Padre.

Fresno, Kern, Stanislaus, Merced and Madera were the leading counties. These five counties accounted for 73% of the total bearing acreage.

OBJECTIVES

The Pacific Regional Office of the USDA's National Agricultural Statistics Service (NASS) conducts an annual acreage survey of California almond growers. The purpose of this survey is to provide annual almond acreage information on new plantings and removals. It is a continuation of a long series of industry funded almond acreage surveys.

This report consists of two parts:

- Estimated almond acreage -- bearing, non-bearing, and total.
- Detailed data by variety, year planted, and county -- as voluntarily reported by almond growers and maintained in the NASS data base.

With perfect information, the estimated almond acreage and the detailed data would be the same. However, differences exist for the following reasons:

- A voluntary survey of nearly 6,500 almond growers is unlikely to attain 100 percent completeness.
- It is difficult for USDA, NASS to detect growers that are planting almonds for the first time.

The detailed data reflects tree removals from over 35,000 acres during the past twelve months. Of this number, a significant amount of acreage was harvested in 2020 prior to being pushed out, and that acreage has already been removed from the detailed data.

PROCEDURES

The major source of the almond detailed data was a questionnaire mailed to all almond growers from our list of almond orchards. The mailing was sent in October 2020. The questionnaire contained previously reported crop, variety, and acreage information preprinted. Producers were asked to update the information with new plantings, removals, and any other corrections; new growers were mailed a blank questionnaire. Growers were given six weeks to respond by mail. Telephone and field follow-up was then undertaken. Data collection ended in April 2021.

To arrive at the estimated almond acreage, our list of almond growers was compared with pesticide application data maintained by County Agricultural Commissioners and the California Department of Pesticide Regulation. In addition, NASS looked at information provided by LandIQ and data collected on the Almond Nursery Sales Report.

ACKNOWLEDGMENTS

The USDA, NASS, Pacific Regional Office sincerely appreciates the many farm operators, owners, and management firms providing the information. A special thanks is due to the Almond Board of California for funding.
