## 2022 Maryland farms and land in farms

The number of farms in Maryland for 2022 is estimated at 12,400 farms, unchanged from 2021, according to Shareefah Williams, state statistician of USDA's National Agricultural Statistics Service, Maryland Field Office. Total land in farms, at 2.00 million acres, is unchanged from 2021. The average farm size for 2022 is 161 acres, also unchanged from the previous year.

Farm numbers and land in farms are differentiated by six economic sales classes. Farms and ranches are classified into these six sales classes by summing the sales of agricultural products and government program payments. Sales class breaks occur at \$10,000, \$100,000, \$250,000, \$500,000, and \$1,000,000. In 2022, the National Agricultural Statistics Service (NASS) implemented a statistical modeling approach to generate survey indications. Producers were asked during the 2022 mid-year surveys to report the value of sales based on production during the 2021 calendar year.
