Week ending May 13, 2018

Issued weekly on the internet, April - November
by the Northeastern Regional Field Office of NASS

nassrfooner@nass.usda.gov

Released May 14, 2018

Good week for field work: New York averaged 5.5 days suitable for field work.

Temperatures ranged from 2 degrees below to 7 degrees above normal. Weekly precipitation ranged from 0.00 to 1.85 inches. Field work made much progress throughout much of the state as operators attempted to catch up as a result of the late spring. Tilling and planting occurred with producers looking forward to continued better weather conditions. Fruit trees progressed into pink stage and full bloom. Long Island vineyards saw bud break with shoots growing fast and crews getting ready to disbud and thin shoots.

Summary based on NOAA Regional Climate Centers (RCCs) data. DFN = departure from normal.

Precipitation (rain or melted snow/ice) in inches. Air temperature in degrees Fahrenheit. Climate normals used are for the 1981-2010 period.

Notice please be advised, the Weekly Crop Progress and Condition Report's Weather Data Tables may be discontinued for budget reasons. This includes the possibility of discontinuing the weather data narratives and graphics Please contact your local NASS Regional Field Office with comments or compliments regarding this issue. The Weekly Crop Progress and Condition Report's Crop Progress and Condition data will remain and be available.

REPORTERS COMMENTS, By County

Reporters are from Extension Service (Ext), Natural Resources Conservation Service (NRCS), Farm Service Agency (FSA), Conservation District (CD), farmers, commodity specialists, or other knowledgeable individuals.

Broome County; Maria Heath:

Field work was in full swing. The weekend was cool and rainy.

Cayuga County; Colleen Cargile, Cayuga County FSA:

A lot of ground was tilled and crops were planted this week. Many oats and spring seedings went in, and even some corn. Next week looks like good weather to start, so hopefully producers will be able to get a good amount of tillage done and crops planted.

Clinton/ Essex Counties; Michael Basedow:

Warm dry weather has allowed apple trees to progress quickly over the last week. Many orchards are at the pink bud stage.

Columbia/ Greene Counties; Matthew Forrest:

Warm, dry weather continued for most of this week and has led to field work making rapid progress. Some fields that were still too wet early in the week have dried out and field work has commenced. Rapid growth and development of blossoms on fruit trees has also occurred. Most trees are now in full bloom or close to full bloom.

Cortland/ Tompkins Counties; Jennifer Doty:

All field work continues full swing. Corn planting has begun, spring seeding and small grains continue. Grass is green and growing.

Genesee/ Niagara/ Orleans Counties; Nathan R Herendeen:

Corn planting, soy planting, oat, and barley planting occurred this past week. Alfalfa and winter wheat growing rapidly. Wheat is pushing stems and heads developing in flag leaf. Alfalfa was showing 12 to 18 inches by end of last week on well drained soils.

Livingston County; Dean R Pendergast:

Much progress was made over the week with tillage and planting.

Oneida County; Devon Kenny:

The weather was dry and relatively warm this week. Many producers were in the field catching up with work due to the late spring. Temps dipped below normal on Saturday. The threat of frost is pretty much over but it's been a while since we've had any significant rainfall and things are starting to get dry.

Ontario County; Joann Rogers, County Executive Director FSA:

Ontario County had a busy week with manure spreading, field prep and some planting.

Oswego County; Ellen deMey:

Sunshine and warmer temperatures have allowed field work. The ground is surprisingly dry in some areas, compared to how much moisture was present earlier in the spring. Corn and beans are being planted and hay fields are greening up nicely.

Schuyler/ Seneca Counties; Kathy Mastellar, CED, Seneca/Schuyler FSA:

The weather this week allowed a lot of field work to be done and corn is finally being planted. Spring forage seedings have been delayed and may not be done by May 15th.

Suffolk County; Alice V Wise:

After bud break last week, shoots are growing rapidly in Long Island vineyards. Crews will soon be disbudding trunks and shoot thinning.
