Week ending June 17, 2018

Issued weekly on the internet, April - November
by the Northeastern Regional Field Office of NASS

nassrfoner@nass.usda.gov

Released June 18, 2018

Excellent week for field work: New York averaged 6.5 days suitable for field work.

Temperatures ranged from 5 degrees below normal to 3 degrees above normal. Weekly precipitation ranged from 0.00 to 2.41 inches. Conditions varied throughout many parts of the state with some getting rain and others concerned about dry conditions. A lot of dry hay was made with most of the first cutting in; however, some areas were having issues with hay coming back due to a lack of moisture. Most crops were planted and emergence appeared good. Strawberries were reported as having a good harvest with good quality and Long Island vineyards were in full bloom.

Summary based on NOAA Regional Climate Centers (RCCs) data. DFN = departure from normal.

Precipitation (rain or melted snow/ice) in inches. Air temperature in degrees Fahrenheit. Climate normals used are for the 1981-2010 period.

REPORTERS COMMENTS, By County

Reporters are from Extension Service (Ext), Natural Resources Conservation Service (NRCS), Farm Service Agency (FSA), Conservation District (CD), farmers, commodity specialists, or other knowledgeable individuals.

Broome County; Maria Heath:

Conditions vary throughout county. Some areas were getting rain and others were getting dry. Lots of pasture growth.

Cayuga County; Colleen Cargile, Cayuga County FSA:

Warm and dry weather continues. Some parts of Cayuga County are a little on the dry side and could definitely use some rain. Hot and humid weather is predicted for this weekend, which should definitely make the corn grow!

Chautauqua County; Anna Emke-Walker:

Weather is unpredictable in our county; great weather for field and crop work for 2-3 days, then rain for 2-3 days. Most corn is planted and emerged. First cutting was challenging to complete but is done.

Clinton/ Essex Counties; Michael Basedow:

Fruit continue to grow well. Fruit thinning has concluded for many orchards.

Cortland/ Tompkins Counties; Jennifer Doty:

Lots of dry hay has been made. First cutting is finishing up. Corn and soybean planting finishing up as well. Planted field emergence is looking good.

Genesee/ Niagara/ Orleans Counties; Nathan R Herendeen:

Dry conditions continue and late planted corn & soy & oat are suffering. Dry hay Harvest continues with good appearance and yield. Regrowth on early harvested fields is OK but late harvested fields were no good on regrowth so far. Wheat is in maturation phase and rain now probably will not make much difference. Showers have missed the Niagara and western Orleans area for the most part. The last of corn and soy planting has been into dry seedbeds. Emergence has been uneven.

Livingston County; Dean R Pendergast:

Crops look good to fair as many acres would benefit from a much needed rain. Most producers have completed first cutting. Some pea acreage is in blossom and would greatly benefit from a nice rain as well.

Oneida County; Devon Kenny:

Conditions have remained good for planting. We had one day of rain with not a lot of accumulation and some fields of corn and hay were starting to look too dry. Most first cutting is finished and hay fields are not coming back very well with the lack of moisture. Strawberries are being harvested and look good. We could use a few days of light steady rain.

Ontario County; Joann Rogers, County Executive Director FSA:

Ontario County had a busy week with hay harvest and spraying crops.

Schuyler/ Seneca Counties; Kathy Mastellar, CED, Seneca/Schuyler FSA:

A week of nice, hot weather. Some rain the morning of 6/13, but then rest of the day was nice. It was being considered whether some crops were failures or should be replanted due to a heavy rain on 5/31 that washed out fields.

Suffolk County; Alice V Wise:

Bloom is widespread in Long Island vineyards.
