USDA to survey row crops county acreage and production

HARRISBURG, PA – Starting in October, the U.S. Department of Agriculture’s National Agricultural Statistics Service (NASS) will survey a sample of producers in 37 states, including Delaware, Maryland, New Jersey, New York, and Pennsylvania as part of its 2023 Row Crops County Agricultural Production Survey. The survey will collect information on total acres planted and harvested and total yield and production of row crops to support estimates down to the county level. Producers can complete their survey securely online at agcounts.usda.gov.

“The data provided by producers will help federal and state programs support the farmer,” said King Whetstone, director of the NASS Northeastern Regional Field Office. “We hope every producer who receives this survey will take the time to respond. Producers benefit when there are data available to help determine accurate loan rates, disaster payments, crop insurance price elections, and more. Without data, agencies such as USDA’s Risk Management Agency or Farm Service Agency may not have enough information on which to base their programs.”

If producers do not submit their completed questionnaires, a NASS representative will contact selected Delaware, Maryland, New Jersey, New York, and Pennsylvania farmers to arrange interviews.

The information producers provide will be used for statistical purposes only. In accordance with federal law, responses will be kept confidential and will not be published in identifiable form.

The data will be published on February 2, 2024, in NASS’s Quick Stats database at quickstats.nass.usda.gov. For more information on this survey, visit nass.usda.gov/go/county-production or contact the NASS Northeastern Field Office at (800) 498-1518.

###

NASS is the federal statistical agency responsible for producing official data about U.S. agriculture and is committed to providing timely, accurate and useful statistics in service to U.S. agriculture.

USDA is an equal opportunity provider, employer, and lender.
