

News Release

Ohio Winter Wheat Seedings

Ohio winter wheat seeded area for 2022 is estimated at 700,000 acres, an increase of 21 percent from last year, according to Cheryl Turner, State Statistician, USDA NASS, Ohio Field Office. Above average precipitation throughout October hampered winter wheat planting progress and emergence. Winter wheat planting finished behind schedule in late November. The crop condition was rated 61 percent good to excellent as of November 28, compared with 69 percent during the same period last year.

U.S. winter wheat planted area for harvest in 2022 is estimated at 34.4 million acres, up 2 percent from 2021 and up 13 percent from 2020. Seeding of the 2022 acreage was underway in early-September and began the month ahead of the 5-year average pace. Throughout much of the season, planting progressed on pace with the 5-year average and reached 96 percent complete by November 21. Emergence was near or lagged slightly behind the 5-year average pace for most of the season.

Winter Wheat Area Seeded - Ohio and United States: 2020 - 2022

Item	Ohio			United States		
	2020	2021	2022	2020	2021	2022
Planted 1,000 acres	530	580	700	30,450	33,648	34,397
Harvested 1,000 acres	490	515		23,029	25,464	
Yield Bushels	71	85		50.9	50.2	
Production 1,000 bu	34,790	43,775		1,171,397	1,277,365
