

November Crop Production

Southern Plains Regional Field Office · Post Office Box 70, Austin, Texas 78767 · 800-626-3142 · www.nass.usda.gov

Cooperating with the Oklahoma Department of Agriculture, Food and Forestry and Texas Department of Agriculture

November 9, 2022

Contact: Jenna Bates or Betty Johnson

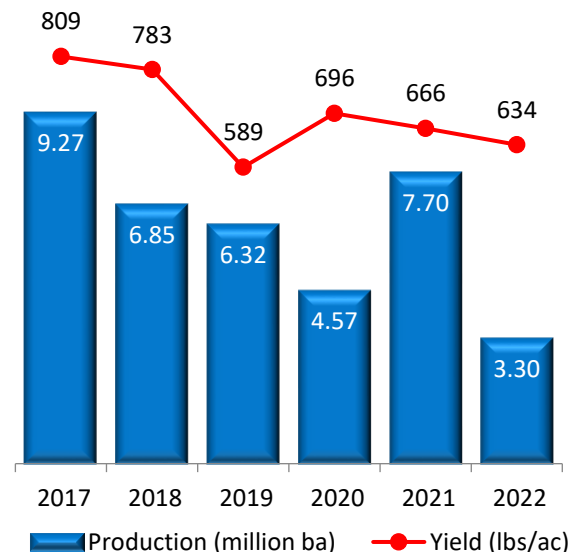

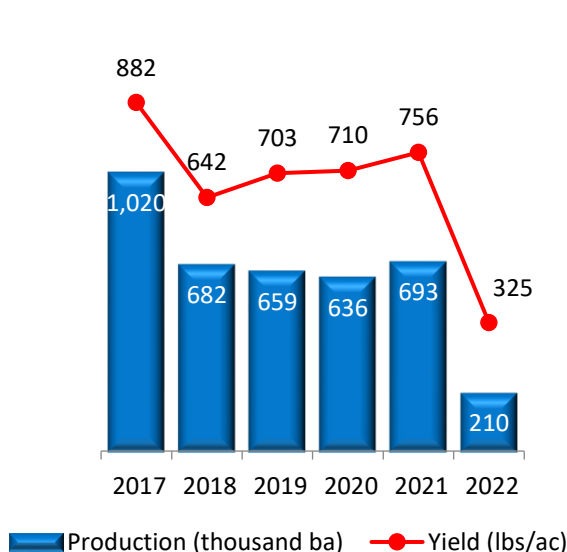

The November row crop harvested, and production forecasts are based on a survey of approximately 1,100 Texas and Oklahoma growers conducted by the Southern Plains Regional Field Office. The survey is conducted primarily by telephone with some use of mail and internet. For Texas cotton, an objective yield survey is conducted in addition to the grower's survey. Actual counts of plants and boll weights are collected from small plots set up in producer fields and are used in conjunction with the results of the grower's survey to forecast yield and production.

Data provided by Oklahoma and Texas operators are the foundation of the estimates for the Southern Plains region. The Southern Plains Regional Field Office would like to thank all farmers that responded to the Ag Yield survey and those who permitted Cotton Objective Yield measurements to be taken from their fields.

UPLAND COTTON

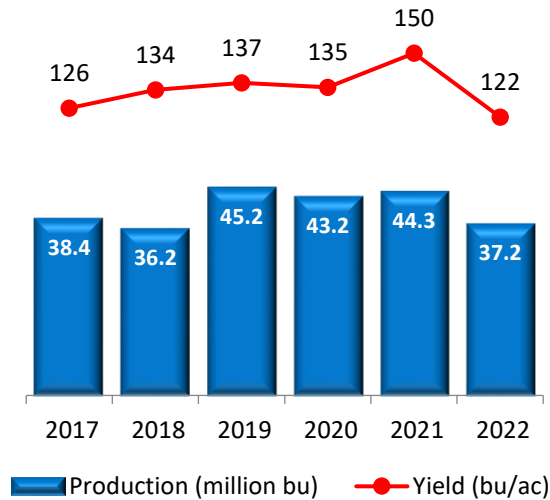

Oklahoma Upland cotton production is forecast at 210 thousand bales, 70 percent lower than 2021. Yield averaged 325 pounds per acre, compared with 756 pounds last year. Acreage harvested, at 310 thousand acres, is down 30 percent from last year.

Texas Upland cotton production is forecast at 3.30 million bales, 57 percent lower than 2021. Yield averaged 634 pounds per acre, compared with 666 pounds last year. Acreage harvested, at 2.50 million acres, is down 55 percent from last year.

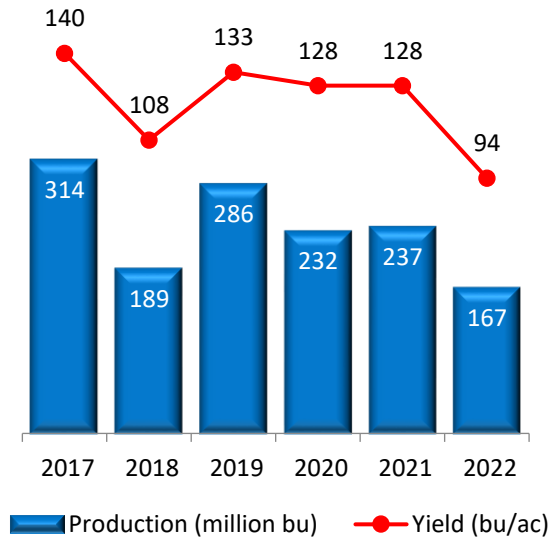

CORN

Oklahoma corn production is forecast at 37.2 million bushels, down 16 percent from the previous year. Statewide yields averaged 122 bushels per acre, 28.0 bushels lower than 2021. Acres harvested for grain, at 305 thousand, is up 3 percent from last year.

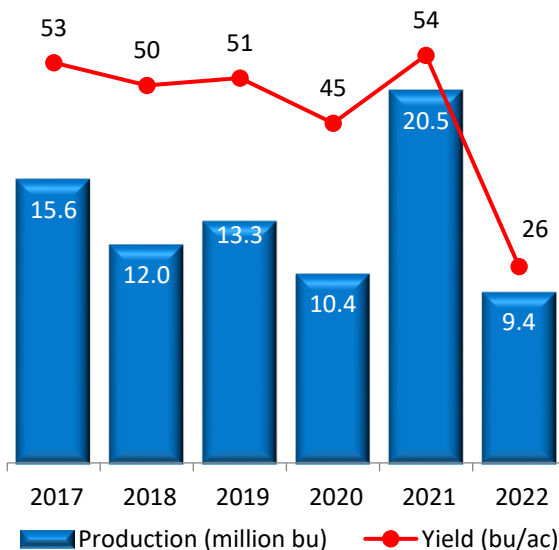

Texas corn production is forecast at 167 million bushels, down 29 percent from the previous year. Statewide yields averaged 94.0 bushels per acre, 34.0 bushels lower than 2021. Acres harvested for grain, at 1.78 million, is down 4 percent from last year.

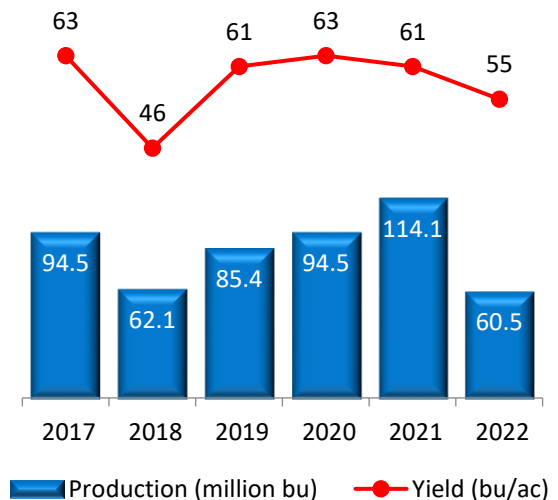

SORGHUM

Oklahoma sorghum production is forecast at 9.36 million bushels, down 54 percent from last year. Yield averaged 26.0 bushels per acre, down 28.0 bushels from the previous year. Acres harvested, at 360 thousand acres, is 5 percent lower than 2021.

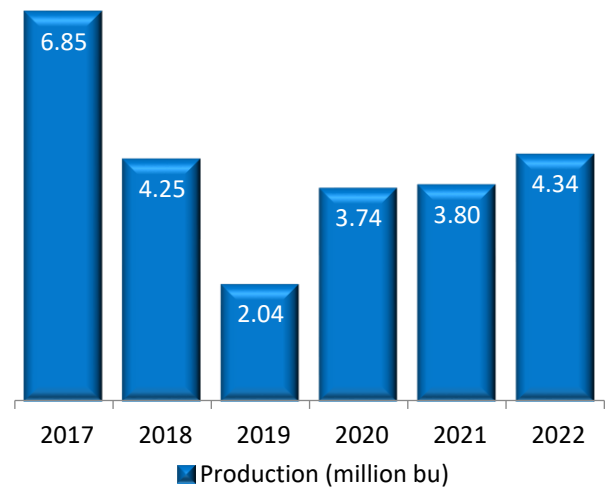

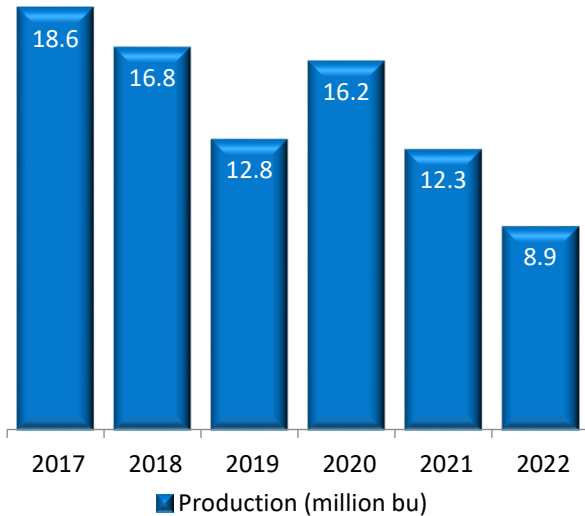

Texas sorghum production is forecast at 60.5 million bushels, down 47 percent from last year. Yield averaged 55.0 bushels per acre, down 6.0 bushels from the previous year. Acres harvested, at 1.10 million acres, is 41 percent lower than 2021.

SOYBEANS

Oklahoma soybean production is forecast at 8.93 million bushels, down 27 percent from last year. Yield is expected to average 17.0 bushels per acre, compared with 23.0 bushels in 2021. Harvested acreage, at 525 thousand acres, is 2 percent lower than last year.

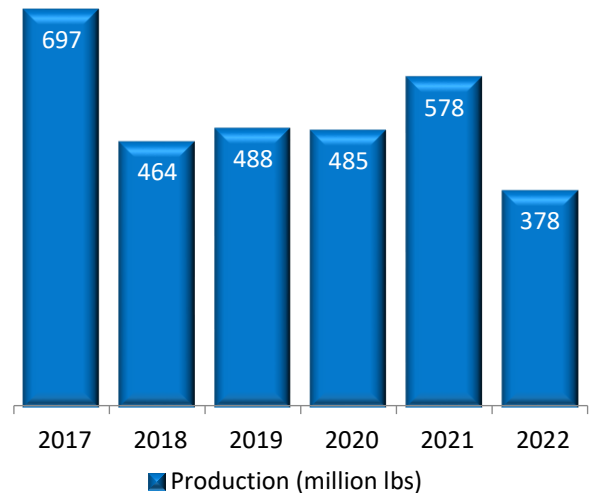

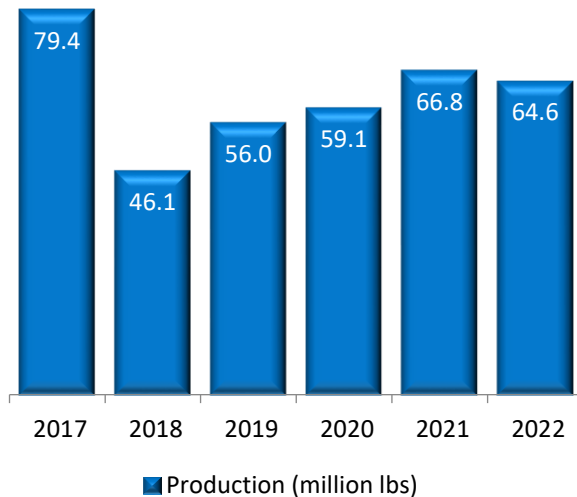

Texas soybean production is forecast at 4.34 million bushels, up 14 percent from last year. Yield is expected to average 31.0 bushels per acre, compared with 38.0 bushels in 2021. Harvested acreage, at 140 thousand acres, is 40 percent higher than last year.

PEANUTS

Oklahoma peanut production is forecast at 64.6 million pounds, 3 percent lower than last year. Yield is forecast at 3,800 pounds per acre, down 650 pounds from 2021. Harvested acres are up 13 percent from last year to 17.0 thousand acres.

Texas peanut production is forecast at 378 million pounds, 35 percent lower than last year. Yield is forecast at 2,700 pounds per acre, down 870 pounds from 2021. Harvested acres are down 14 percent from last year to 140 thousand acres.

CROP SUMMARY

Crop Acreage, Yield, and Production - Oklahoma, Texas, and United States: 2021 and forecasted November 1, 2022

Item	Planted		Harvested		Yield per Acre		Unit	Production

¹ Area planted for all purposes.

² Cotton yield in pounds and production in 480-pound bales.

³ Yield in pounds and production in cwt.

U.S. Highlights: United States **upland cotton** production is forecast to total 13.6 million bales, down 21 percent from last year. **Corn** production is forecast at 13.9 billion bushels, down 8 percent from 2021. **Sorghum** crop production is down 47 percent from last year at 236 million bushels. The U.S. **peanut** production is forecast at 5.77 billion pounds, down 9 percent from a year ago. **Soybean** production is forecast at 4.35 billion bushels, 3 percent below last year's estimate. U.S. **rice** production is forecast at 164 million cwt, down 14 percent from 2021.
