This report contains the results from the **June Agricultural Survey**, a probability survey that includes a sample of all operations across each state, which was conducted during the first two weeks of June 2022. The estimates provided in this report are intended to reflect acres planted and remaining to be planted for some crops. Acreage estimates are open to revision in the September and October Crop Production releases based on additional administrative data. Thanks to all the farm operators who responded to this survey and made these estimates possible.
