**Certified Organic Highlights**

The 2016 Certified Organic Survey is a survey of all operations identified as having certified organic production. Certified organic farms must meet the standards set out by USDA’s Agricultural Marketing Service’s (AMS) National Organic Program (NOP) and be certified compliant by an approved agent of NOP. Results from the survey provide acreage, production, and sales data for a variety of certified organic crops and certified organic livestock.

In 2016, the United States had 14,217 certified organic farms that produced \$7.6 billion in certified organic products. Oklahoma had 34 certified organic farms that produced \$4.6 million in certified organic products. Of the 18,008 acres of certified land in Oklahoma, 9,884 acres were cropland and 8,124 acres were pastureland/rangeland. The top two certified commodities sold in Oklahoma were soybeans for beans with sales valued at \$863,120 and wheat with sales valued at \$687,480.
