Certified Organic Highlights

The 2016 Certified Organic Survey is a survey of all operations identified as having certified organic production. Certified organic farms must meet the standards set out by USDA’s Agricultural Marketing Service’s (AMS) National Organic Program (NOP) and be certified compliant by an approved agent of NOP. Results from the survey provide acreage, production, and sales data for a variety of certified organic crops and certified organic livestock.

In 2016, the United States had 14,217 certified organic farms that produced \$7.6 billion in certified organic products. Tennessee had 38 certified organic farms that produced \$5.6 million in certified organic products. Of the 3,341 acres of certified land in Tennessee, 2,632 acres were cropland and 709 acres were pastureland/rangeland. The top two certified commodities sold in Tennessee were corn for grain or seed with sales valued at \$1.2 million and tomatoes grown in the open with sales valued at \$691,623.

For more information on the 2016 Certified Organic Survey and related reports, please visit the NASS Organic Agriculture page at: www.nass.usda.gov/organics.

Farms, Land, and Value of Sales on Certified Organic Farms: 2016 and 2015
