Certified Organic Highlights

The 2016 Certified Organic Survey is a survey of all operations identified as having certified organic production. Certified organic farms must meet the standards set out by USDA’s Agricultural Marketing Service’s (AMS) National Organic Program (NOP) and be certified compliant by an approved agent of NOP. Results from the survey provide acreage, production, and sales data for a variety of certified organic crops and certified organic livestock.

In 2016, the United States had 14,217 certified organic farms that produced \$7.6 billion in certified organic products. Wisconsin had 1,276 certified organic farms that produced \$255.5 million in certified organic products. Of the 219,266 acres of certified land in Wisconsin, 167,396 acres were cropland and 51,870 acres were pastureland/rangeland. The top two certified commodities sold in Wisconsin were milk from cows with sales valued at \$125.9 million and other cattle with sales valued at \$15.8 million.

For more information on the 2016 Certified Organic Survey and related reports, please visit the NASS Organic Agriculture page at: www.nass.usda.gov/organics.

Farms, Land, and Value of Sales on Certified Organic Farms: 2016 and 2015
